Announced Audit

AUDIT EXECUTIVE SUMMARY:

Review of the Food Safety Management System, Good Manufacturing Practices and HACCP Plan of Henry Avocados Corp. located in Escondido, CA. This is operation employs 60 workers in peak season, however 10 workers were observed during the audit. This is an avocado packing operation that does not have washing steps on the process. Product is received in plastic bins in bulk from local growers or in final packaging from Mexico. Raw product is put on to a conveyor belt where is dry clean with brushes, then it is graded automatically or by hand. After that product is put into a singulator where PLU stickers are applied to each fruit unit. From there product can be packed in bags automatically or run into packing tubes to be hand pack or packed via fill machine in cartons. Cartons are then palletized and from there they can be sent to ripening rooms at 68 F or put in to cold storage at 40F. Product is staged and then shipped in temperature control trailers previously checked. Municipal water is used and microbiologically tested for handwashing. Chemical storages, maintenance shop, break rooms, toilet and handwashing stations were observed during the audit.

Addendum(s) included in the audit:

Not Applicable
